

Who we are	Where we are in time and place	How we express ourselves	How the world works	How we organize ourselves	Sharing the planet
An inquiry into the nature of the self; beliefs and values; personal, physical, mental, social and spiritual health; human relationships including families, friends, communities, and cultures; rights and responsibilities; what it means to be human.	An inquiry into orientation in place and time; personal histories; homes and journeys; the discoveries, explorations and migrations of humankind; the relationships between and the interconnectedness of individuals and civilizations, from local and global perspectives.	An inquiry into the ways in which we discover and express ideas, feelings, nature, culture, beliefs and values; the ways in which we reflect on, extend and enjoy our creativity; our appreciation of the aesthetic.	An inquiry into the natural world and its laws; the interaction between the natural world (physical and biological) and human societies; how humans use their understanding of scientific principles; the impact of scientific and technological advances on society and on the environment.	An inquiry into the interconnectedness of human-made systems and communities; the structure and function of organizations; societal decision-making; economic activities and their impact on humankind and the environment.	An inquiry into rights and responsibilities in the struggle to share finite resources with other people and with other living things; communities and the relationships within and between them; access to equal opportunities; peace and conflict resolution.
KG cycle A 2019/20					
We are all unique individuals and appreciate similarities and differences.	Our personal journeys connect us.	People communicate their feelings, thoughts and actions through arts.	Materials are used for a purpose based on their properties.	At school, children learn through play, make friends, and participate in the community.	Plants play an important role in sustaining all living things.

KG cycle B 2020/21					
Rules and roles shape our relationships.	Homes reflect where and when the inhabitants live.	We express ourselves using light and colour.	Weather and seasons affect our lives.	We have a responsibility to help others in our community.	Animals live in different habitats and people's actions influence them.
Grade 1					
Healthy living is a lifelong process and a privilege.	Geology and landscape change over time.	Non-verbal communication allows us to convey a message and express ourselves.	Scientific collaboration leads to a wider understanding.	Goods go through a process before a consumer can buy them.	When the needs of living things are not met, it leads to endangerment and potentially extinction.
Grade 2					
The human body functions using different interconnected systems.	Inspiration leads to invention.	Telling stories through different media can change our experience.	Different living things have different life cycles and depend on each other and the environment to survive.	Engineers consider scientific principles when designing cities .	Water is a finite resource that should be conserved for humans, animals, and plants.
Grade 3					
A person's action determines whether they are heroes.	Space exploration and discovery can develop new understanding.	Experiencing different cultures promotes international mindedness.	Machine are used to change motion and force to make physical work easier Include energy	Markets are established to meet the consumer demands of a community.	Conservation of plant diversity is necessary for the well-being of living things.

Grade 4					
Interactions amongst human body systems contribute to health and survival.	Civilizations develop over time and continue to have influence throughout time.	Artistic expression is influenced by the society in which it exists.	Materials exist in different states and can be changed.	Markets exist in order to fulfil the needs and wants of a community.	The face of the earth changes due to geological and human forces.
Grade 5					
During puberty we undergo changes that influence our interactions.	Human migration is a response to challenges, risks, and opportunities.	Artists make critical choices to communicate a message effectively.	Energy appears in different forms and can be transformed within a system.	People make decisions in order to function as an effective community.	Global citizens make informed choices about the use of limited resources.
